

eBook on Working Online

by Kiran Kumar, CEO of Forexveda India Limited

If you do not have patience to read the whole eBook, read the last 2 pages only.

It's a human nature to go after easy money and quick money. Almost every second person has burnt his/her fingers trying to make easy money or quick money joining MLM programs or Internet job offers. Most of the people who tried 'work from home online' programs are the ones who knew only typing, browsing and mailing. I always told my students that you cannot make easy money online and you must work hard. I will not say that anymore because now I have a concept that lets people make easy money and big money. You don't have to pay a joining fee or invest anything to make money with syberveda.com.

Ecommerce is the fastest growing business with global annual turnover crossing 1 trillion dollars in 2011 (Rupees 45,00,000 Crores!) Selling online is much easier than selling products in shops or showrooms. You too can be a part of this business without worrying about payments, deliveries and order executions. All you need to do is click 5 times a week in syberveda.com

Before you read further, I expect you to sign up for free at syberveda.com and login using your email id and password. If your friend has referred syberveda, use his/her membership id as invitation id. If you don't have an invitation id use 215621562156. Your 1st click is on sign in and you can click on Invite link in profile page and go to the invite page. Chose the Email Template 1 and in the invite page sign in with your login id and password and import your address book. If you are a regular internet user, you should find minimum 100 email ids of your friends in your address book. Click on select all and click on invite. These 5 clicks will be worth 1000s of Rupees of income over a period of time.

Most of the people who approach us think that they can make easy money doing data entry. Most of the people looking for online income are not regular internet users. People who have some knowledge of internet think that all online income opportunities are scams. We expect people with little internet knowledge to join us now and others to follow later. You don't have to be an internet expert to earn with syberveda.com, but you must have a good online database. Do not get scared by the word database. Creating database is simple. If you use messenger like yahoo messenger or gtalk, add e-mail ids of your contacts there. If you don't have contacts, make contacts using social networking sites. To earn Rs. 34,300 with syberveda.com you must have about 20 contacts in your address book. To earn millions, you may have to work 1 or 2 hours a day making online contacts. If you know to use MS Excel, you can list your contacts in Excel. Otherwise, you can list your contacts in a word file or notepad. Your database will look like this in your notepad.

Name : Amitabh Bacchan

Gender : Male

Age : 74

Location : Mumbai

Occupation : Actor

E-mail id : a.bachhan@bollywoodmovies.com

This information is enough to earn with syberveda.com. However, if you have more information about your contact, that will be more beneficial. If you have 500 or 1000 contacts, that will help you earn loads of money just by sending target based emails through syberveda.com. We have so many products and offers in syberveda.com and we expect minimum 50% of your contacts to sign up at syberveda.com. Some may sign up to buy a Cell phone, some may sign up to attend online jobmela. Some may like our offer 'Malaysia holiday for Rs. 13,000' or some may like to attend our internet course or web designing course online. Some may join just to earn online. Some may join our forex, equity or commodity forums. Soon, we will add groceries to our product list and people can make money by buying groceries too. You don't have to worry about how many people buy from us. All we need is sign ups. People can sign up for free and use other services like classifieds, Bulletin Board Service, Groups, Jobmela...etc. If 20 people sign up from your 5 clicks, you can be sure of a decent income from the portal.

If I explain the concept of syberwallets, you may get confused. Once you start working, you will understand how the concept works. Once you understand the concept, we expect you to explain this concept to your friends. We will not be able to explain the concept to millions of subscribers on phone or chat. If you are a consumer, your benefits will be high. If you are not a consumer, you may earn less. You can earn syberwallets by doing business with us. Business is not just limited to buying electronic products or home appliances or groceries or clothes. You can take lot of other services too. You can do hotel bookings through us or book international travel packages. You can buy or rent an apartment and get 10 to 100 syberwallets from us. For example, if you are planning to buy an apartment in Bangalore, just tell us. We help you find your ideal apartment at the same price what the builder might offer you as a walk in client. You get 100 syberwallets when you buy the apartment through us. Some of our products or services are offered in few cities only now and later we will expand to more cities. Each syberwallet is worth an income of Rs. 34,300. You can get a syberwallet either by doing shopping with us or just by booking a product. For example, you can get 1 syberwallet when you buy a cell phone paying Rs. 3000 or whatever is the cost. If you don't want to shop now, you can just book a product paying Rs. 300 and get the product when you make enough money from the portal. If you don't want to spend a single rupee (don't even want to buy clothes or groceries from us) you can sell your work to other members. A member may make 1 lac from your work over a period of time and he may offer you an instant income of Rs. 20,000

to buy your work. So, for you it will be an instant income and for a member it will be a profit of Rs. 80,000 over a period of time.

I know the concept is not so easy to understand. People who have wallets understand the concept quickly. People who don't have wallets may take longer time. Have an open mind and give us 5 clicks. When you sign up, you receive a call from a home based Tele Marketing Executive who will explain you the concept provided you have already done the 1st step of inviting your friends. If you have not done that you may not get a call. I suggest you to book a product paying Rs. 300 and start the work. If you are convinced about the concept, you can pay without fear. If not, think that this could be a scam and you may lose your money. Can't you take a risk of Rs. 300?

Remeber one thing. This is not an MLM scheme and we don't offer passive or multi level income. You only have a direct income. But the concept is designed in such a way that you may earn Rs. 3,430 when we earn Rs. 300 from a sale.

How do we make money and why do we pay our members?

A news paper with a high circulation can make millions just because of it's circulation. Similarly a website with high traffic can earn huge income just because of the traffic. We make money from web traffic. Imagine yourself as the owner of a leading news paper in India. You can make money from any business you start just because you can advertise for free. For us, this website is like a news paper. If we start an overseas education consultancy company in Mysore, we may earn only from students of Mysore who are interested in studying in Australia or USA. But if we have a website or news paper which has circulation all over India, we can get students from all over the country. Doing business online reduces overheads too. A company may spend on posh offices and many staff where as at syberveda, one online staff handles one business. Online income is just an attraction for subscribers to visit the website often. There are many ways of making money using the online database. We make money from the ecommerce business. Our income percentage is much higher compared to companies that have huge overheads. If a mobile shop makes Rs. 100 per every mobile sold, we may make Rs. 200 by selling the product at the same price. That is because our over heads are low. Companies may spend on advertising and we don't. Our advertisement is taken care of by our members. We make money with the help of members and we share the revenues with our members. If more members earn from syberveda, we get more word of mouth publicity and we can do more business. Our marketing strategy is 100 times more stronger than conventional marketing strategies.

Telemarketing

Out of 1000 people a Telemarketing Executive contacts, 900 people normally bang the phone as soon as they realise that call is from a stranger. Out of 100 people, 90

people may listen to the TM and reply 'not interested'. Only 10 people may turn out to be potential customers. Telemarketing executive may be wasting time and money on people who are not potential customers. For example, TM may be calling a student with an offer of personal loan or home loan but they are not eligible for both.

When TM from syberveda.com calls a member, more than 900 people will listen as they have agreed to receive calls from syberveda.com while signing up. Also syberveda.com TM makes target based calls as they already have the details of the subscribers.

Email Marketing

Out of 1000 emails, 900 may reach the junk mail folders and will not be read. From remaining 100 emails, 90 may get deleted before being read. Only 10 emails may reach the potential customer and only 1 may respond or give business. Email marketing creates Spam issues too.

Syberveda.com offers go through members through their address book so out of 1000 emails minimum 900 emails reach the inbox. Syberveda.com offers go only to the potential customers. Since the emails go to known people, people may not get annoyed or they may not delete the email without reading. This makes syberveda.com marketing 100 times more powerful than traditional marketing campaigns. We achieve this with the help of your 5 clicks.

Local ecommerce

Most of our subscribers may hesitate buying products online. Hence we offer local ecommerce where the buyer and seller are from the same town/city. If you order for a washing machine, you may get the product from the home appliance dealer operating in your own city so that you don't have to fear if something goes wrong with the product. We are not offering home appliances and electronic products in all the cities at present. We are looking for franchises in most of the towns and cities who can invest Rs. 1 lac and take care of deliveries and payment collections. The associates may not earn much in 1st 6 months but later they have a scope of earning millions.

Penalties

Spamming is a major issue on the internet. Since there is no strict laws to punish spammers, people email or post lot of junk on the internet. We penalise the members for spamming. If you have not earned yet, your future income may get reduced because of penalties. Those who spam repeatedly risk their profile getting blocked forever. Classifieds and jobs sections are for genuine ads. If you try to post a get rich quick ad or publicize your company or business, we will put a penalty.

If you place an order and don't take the delivery, we put a penalty of Rs. 500 to Rs. 2000. If you have an income, penalty will be deducted from the income.

By sending mails you will be saving your friends from becoming victims of internet scams and also. That is the easiest way to start your online income.

We are against spamming. Do not send this email to people who are not known to you.

Internet Scams

I have come across many educated people becoming victims of internet scams like Nigerian scams. Let me start with Nigerian scams and move on to other kind of scams. Most of you might have received emails from some strangers saying "I am the wife of former Nigerian President and I have a confidential matter to discuss with you..." They normally send an email with offers of 100s of millions dollars and offer you an incentive to help them transfer the funds to your bank account. Once you start communicating with them they make you believe that the money has been sent and you need to pay the courier charges to get the delivery. They may use the names of some well known courier companies and use email ids like couriercompanyname@gmail.com or yahoo.com These scammers use the names of MNC banks and use email ids like citybankmanila@gmail.com. Some e-mails speak about some bank accounts where the account holder has died leaving behind millions of dollars which is not claimed by anyone. I have met some people who became victim of another version of this scam. The scammer convinced the victim that he has US Dollar notes with chemical coating. Victim paid thousands of rupees to buy some chemicals to wash these currency notes which were nothing but plain paper. To convince the victim, scammer had put some real USD notes. After the victim pays the money for chemicals, scammer will either disappear or demand more money giving some excuses. These scammers can even create a fake website with a fake bank name and show that they have actually transferred few millions to your bank account

Now there are variants of Nigerian scam. A doctor may receive an email with offers from abroad to set up a hospital. The offer may look genuine as the recipient is a doctor. A dance teacher may get an offer to teach students abroad. Do not take the offer seriously if the sender doesn't give complete details of his organization. If you get the website details, there are ways to find out the owner's details. You can also trace the email and see the source. My Odissi dancer wife received similar email and

was very excited. I checked the email source. The sender gave the address of UK and but his IP address was traced to Africa. (I teach my students how to track the source of an email)

High Profit schemes

I am an online forex trader since past 14 years. I have seen few people making millions and many people losing every penny in their account. If you search online, you may find thousands of advertisements that offer to double your money in 1 or 2 months. If one can earn 20% per month consistent income from stocks or forex trading, he should be able to double his money in 5 months. That means in 5 years he should be able to double the money 12 times. If Rs 1 lac is doubled 12 times it will become Rs. 40 Crores! If a person is offering this kind of services, he should have at least a Crore right?

American Scams

Internet is dominated by Americans because almost every second American is an internet user. Most of the easy money schemes originated from USA. If you search online, you will find millions of websites which talk about earning few thousand dollars in a week working 1 hour a day. In India, most of the people think that if the offer is from USA, it has to be genuine. For them, every American company is like Intel or Microsoft. They don't understand that some jobless dumb idiot (smart con) has created a website and fooling people from all over the world. If you think anything that comes from America is great, you may go for such offers. I know many forex traders from my town going for advisory services from Americans when people all over the world come to me for my advisory services. Ghar ki murgi daal barabar?

How to protect yourself from these kind of scammers?

First thing you have to know that no one pays you money for no reason. Millions of dollars of dealings don't take place online unless both the parties are big and well established corporates. If citybank manila is sending you the money, the email id should look something like this sales@citibank.com.ph (ph is for Philippines) Anybody can create a free email id in yahoo or gmail. So if you receive an email from presidentofindia@gmail.com or yahoo.com don't be under the impression that our honourable President has sent you an email.

You can get lot of free deals online, but surely not free money. One can pay only if there is a good revenue generation and you help them in that revenue generation.

Work from home scams. Data Entry, Online survey, Google adsense...etc

Most of the people think that working from home means online data entry. People who know only typing have become victims of these data entry scams. Many companies offered data entry jobs promising thousands of rupees to people. These companies took joining fee from many job seekers and disappeared. People paid the money without using their common sense. If I have data entry jobs where my client pays Rs. 100 per hour, why will I offer it to others? I can appoint 100 staff, pay them Rs. 20 per hour and pocket the remaining Rs. 80 right? It is easy to get man power for easy jobs. It is difficult to find people for jobs that require skills. If you are have some skills you can surely make lot of money. Do not expect any company to pay you just for a simple typing or clicking jobs.

Remember : No genuine company will ask money from you to give you work. If somebody is demanding money for a home based job, simply reject it.

MLM Schemes

Many companies have combined home based jobs with MLM schemes. In these kind of schemes there is no actual revenue generation. You pay money to the company to join and find another 3 or 4 people (2 people in binary networks) who will pay and join. When they pay, company keeps some money and pays you the commissions. There is only a money rotation. As long as there are 'bakras' these kind of schemes will run.

Why do MLMs fail?

Marketing is not everyone's cup of tea. Most of the MLM companies sell products that is actually not in demand. So, your task will be to market a product to some one who doesn't actually require it. Since marketing is not everybody's cup of tea, these kind of networks fail and some leaders make huge money but millions lose.
